

Congratulations to our 2022 Award winners!

**Paxton Fetterman, Dec '21
Slippery Rock University**

After graduating with my bachelor's degree in biology from Slippery Rock University (May 2021), I continued my education at this institution by completing my master's degree in secondary education. I finished student teaching in December 2021 and now am working as a long-term chemistry substitute teacher. When I am not in school, I love to be outdoors. This summer, I will be participating in two non-traditional experiences by educating youth about conservation and the environment through Quebec-Labrador Foundation (QLF) and the Wildlife Leadership Academy (WLA). I am very excited to continue to grow and expand upon my teaching through these experiences.
